SUBJECT INDEX

Aboveground net primary production, 64
Adaptive harvest policy, 496
Adelges tsugae Annand (Homoptera: Adelgidae), 414
Adjacency restraints, 526, 569
Adjustment for closure error, 405
Allometry, 458
Allozymes, 390
Amphibians, 430
Anthropogenic factors, 158
Appalachians, southern, 73, 603
Aquatic habitat, 96
Arceuthobium laricis, 559
Artificial reforestation, 390
Atmospheric-flow method, 272
Auctions, federal timber sale, 485
Austria, 87

Bandwidth, 445
Bayesian inference, 134
Binary logistic regression, 341
Biodiversity, 610
Biomass partitioning, 317
Black bear (See *Ursus americanus*)
Bootstrap, 266

California oak woodlands, 430
California, 341
Canopy structure, 64
Carbon balance, 272
Carolina hemlock (See *Tsuga caroliniana)*
CART, 507
Causation, 254
CGE analysis, 578
Change points, 465
Classification trees, 507
Clearcut restrictions, 569
Climate, 158, 550
Coastal forests, 618
Cointegration, 17
Combinatorial optimization, 96
Commodities, 272
Commodity production goals, 96
Comparative methodology, 254
Compartment polygon, 405
Competition indices, 224
Computer-based analysis, 254
Conjoint analysis, 145, 421
Conjoint ranking survey, 421
Correlation, 246
Cost function analysis, regional, 517
Costa Rica, 185
Cross-price demand elasticities, 517
Crown profile modeling, 445

Data Envelopment Analysis (DEA), 298
Decision analysis, 356
Delphi technique, 610
Demography, 341
Dendrochronology, 158, 465, 550
Density, 587
Diameter distributions, 285
Disease, 239
Distance-independent growth model, 224
Disturbance, 465
Dominant height, 37
Douglas-fir (See *Pseudotsuga menziesii*)
Dynamic programming, 526

Eastern hemlock (See *Tsuga canadensis*)
Ecological modeling, 610
Ecophysiology, 550
Environmental certification, 379
Environmental quality, 603
Eucalyptus, 37
Eucalyptus nitens, 587
Eucalyptus urophylla, 246
Evaluation, 298
Even-aged stand management, 496
Expert opinion, 539, 510

Fertigation, 308
Fiber length, 185
Fire frequency, 465
Fire history, 465
Fire severity, 341
Fixed-area plot width, 438
Flooding, 618
Forest canopy height simulation, 438
Forest edge, 526
Forest fire suppresion modeling, 539
Forest harvests, 272
Forest inventory, 58, 266
Forest management, 47, 113, 356, 496, 526
Forest planning, 610
Forest policy, 254
Forest practice regulations, 569
Forest products, 17
Forest sector models, 24
Forest soil additions, 203
Forest tenure, 365
Forest value, 73
French Guiana, 113
Fuelwood, 272

Gene conservation, 390
Generation, 587
Genetic diversity, 390
Genetic parameters, 246
Genetics, 587
Genotype, 64
Geographic variation, 185
Germination, 139
GIS, 569
Goal programming, 47
GPS, 405
Grade distribution, 73
Green marketing, 379
Greenhouse gas inventory, 272
Growth efficiency, 317
Gypsy moth (See *Lymantria dispar* [L.])

Habitat use, 430
Hardwoods, 550
Hazard of burning, 465
Hedonic, 603
Height growth, 158
Hemlock wooly adelgid (See *Adelges tsugae* Annand [Homoptera: Adelgidae])
Heritability, 246, 587
Heuristic programming, 96
Hosts, 559

Incentives, 365
Individual tree mixed models, 246
Individual tree model, 225
Individual tree growth models, 87
Initial attack fire crew effectiveness, 539
Input substitution, 517
Intensive culture, 308
International trade, 17
Interpretation, 254
Intraspecific competition, 397
Irrigation, 308

Jack pine (See *Pinus banksiana* [Lamb.])
Johansen's method, 17

Kernel, 445

Land expectation value, 356
Landscape ecology, 569
Landscape, 550
Larch dwarf mistletoe (See *Arceuthobium laricis*)
Latewood proportion, 212
Law of one price, 17
Leaf area index, 64
Leaf net photosynthesis, 308
Light attenuation, 64
Light interception, 64
Line intersect sampling, 58
Linear and quadratic main effects, 421
Linear model, 134
Liquidambar styraciflua, 308, 397
Loblolly pine (See *Pinus taeda*)
Local linear, 445
Local quadratic, 445
Lodgepole pine (See *Pinus contorta*)
Logging industry, 517
Logistic regression, 507
Loss function, 266
Lymantria dispar (L.), 239

Mammals, small, 430
Market failures, 365
Market segmentation, 379
Markov Chain Monte Carlo, 134
Mathematical programming, 96
Matrix model, 113
Maximum likelihood, 285
Measurement error models, 224
Mexico, 579
Mixed conifer forest, 341
Mixed effects analysis, 212
Model identification, 158

Monte carlo simulations, 365
Mortality, 246
Multigoal programming, 47
Multiple criteria analysis, 47
Multiple objectives, 421
Multivariate allometry, 458
Multivariate growth equations, 458
Multivariate statistics, 430
Multivariate t-distribution, 266
Mycorrhizae, 203

National forests, 421
Natural regeneration, 390
Net photosynthesis, 308
Nitrogen fertilization, 599
Nitrogen, 454
Nonlinear difference equations, 37
Nonmarket, 603
Nonparametric regression analysis, 445
Nonsimple sequential inhibition process, 125
Norway spruce, 87
Numerical evaluation of decision model, 356
Nutrient limitation, 454
Nuttall oak (see *Quercus nuttalii*)

Ontario, 158
Optimal control, 24
Optimal forest taxation, 165
Optimal planting density, 356
Optimization, 266
Option values, 192
Ordered probit, 73, 421
Oregon, 96
Overcup oak (See *Quercus lyrata*)
Own-price demand elasticities, 517

Pacific Northwest, 517, 559
Pacific Southeast, 517
Parameter recovery, 285
Parasitism, 239
Patchy stands, 224
Pennsylvania, central, 550
Performance, 298
Pest control, 308
Pinus banksiana [Lamb.], 158
P. contorta, 454
*P. elliottii [*engelm.], 139
P. helepensis, 203
P. sylvestris, 356
P. taeda L., 64, 139, 212, 308, 317, 397, 445
Pisolithus arhizus, 203
Plant density, 397
Plant Growth-Promoting Rhizobacteria (PGPR), 130
Policy reform, 165
Portugal, 37
Pre- and postburn mortality, 341
Precision, 37
Prescribed fire, 341
Pro-Campo, 579
Production decline in old forests, 454
Pseudotsuga menziesii, 125, 134, 390, *599*
Public forestry organizations, 298
Public involvement, 421
Pulp, 587

Qualitative data, 254
Quasi-likelihood, 465
Quercus michauxii, 618
Q. nigra, 618
Q. nuttalii, 618
Quercus lyrata, 618

Radial gradients, 185
Radiation use efficiency, 64
Random coefficient regresion modeling, 539
Ratio of means, 266
Recreation, 603
Regression, 134
Regression, seemingly unrelated, 87
Repeated measures, 539
Reptiles, 430
Reserve prices, 485
Response curves, 539
Restricted Maximum Likelihood (REML) analysis, 246
Ring specific gravity, 212
Ripley's *K(d),* 125
Risk preferences, 496
Risk, private and aggregate, 4
Rotation age, 496
Roundwood, 272

Salinity, 618
Sampling design effects on model coefficients, 224
Sawnwood imports, 17
Scheduling, 526
Scots pine (See *Pinus sylvestris*)
Sea level rise, 618
Second best equilibria, 165
Sectoral analysis, 578
Seed orchard, 587
Seedling growth, 139
Selection bias, 246
Sequoia National Park, California, 341
Sharecropping, 365
SIC 2411, 517
Silviculture, 113, 239, 365
Simulation, 58, 145, 578
Simultaneous equations bias, 87
Simultaneous regression techniques, 87
Site index, 158
Site preparation, 203
Slash pine (See *Pinus elliottii* [engelm.])
Softwood lumber, 145
Soil organic matter, 397
Spain, 47, 203
Spatial modeling, 526
Spatial pattern of trees, 125
Species composition, 113
Stand visualization models, 125
Standard errors of area estimates, 405
Static simulation, 24
Stem density, 438
Stochastic dominance analysis, 496
Stochastic dynamic programming, 192
Stochastic optimization, 356
Stochastic prices, 192
Stock-change method, 272
Stream sediment, 96
Stream temperature, 96
Structural based prediction, 224
Subsidies, 578
Sugars, 599
Survivorship, 239
Swamp chestnut oak (See *Quercus michauxii)*
Sweetgum (See Liquidambar styraciflua)

Tabu search, 96
Taxation, 4, 165
Terpenes, 599
Terracing, 203
Thinning, 239, 599
Three-stage least squares, 87
Timber market, 24
Timber rotation, 192
Timber sales, 485
Time-since-fire map data, 465
Tobit model, 298
Trade-offs, lumber quality and price, 145
Transect relascope sampling, 58
Translog cost function, 517
Traversing, 405
Tree coordinates, 125
Tree mortality, 507
Tree quality, 73
Tree-ring response to drought, 550
Tropical hardwoods, 185
Tropical rain forest management, 113
Tsuga canadensis, 414
T. caroliniana, 414

Uncertainty, 356, 496
Underestimation bias, 438
Unit root econometrics, 17
United Kingdom, 17
Urban refuse, 203
Ursus americanus, 599

Validation, 37
Valuation, 603
Variance components modeling, 610
Variance formulas for area estimate, 405
Vochysia Guatemalensis, 185

Water oak (See *Quercus nigra*)
Weighted distributions, 285
Welfare, 578
Wood density, 185, 212
Wood fiber production, 587
Wood preservation, 145
Wood products, 272

X-ray densitometry, 212

Yield-density equation, 397
